Chapter 1 — Section 1

The quarterly report sets out the position as it stood at the end of the period, with the application of each measure recorded against the baseline agreed beforehand. Nothing in this column continues into the right-hand column on the same line.

Where a figure could not be verified it is marked plainly rather than estimated. The application of that rule is the reason some rows are blank. A reader following the text should reach this column only after the left-hand one has finished.

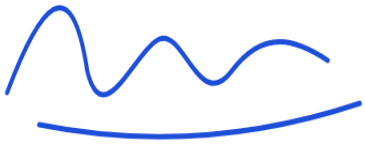

Figure 1. Sample plate from page 1.

Page 1 closing note: the application of the method above is repeated here.

Chapter 1 — Section 2

The quarterly report sets out the position as it stood at the end of the period, with the application of each measure recorded against the baseline agreed beforehand. Nothing in this column continues into the right-hand column on the same line.

Where a figure could not be verified it is marked plainly rather than estimated. The application of that rule is the reason some rows are blank. A reader following the text should reach this column only after the left-hand one has finished.

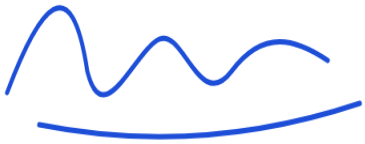

Figure 2. Sample plate from page 2.

Page 2 closing note: the application of the method above is repeated here.

Chapter 1 — Section 3

The quarterly report sets out the position as it stood at the end of the period, with the application of each measure recorded against the baseline agreed beforehand. Nothing in this column continues into the right-hand column on the same line.

Where a figure could not be verified it is marked plainly rather than estimated. The application of that rule is the reason some rows are blank. A reader following the text should reach this column only after the left-hand one has finished.
